AI Document Processing & Smart Dashboards

AI that reads invoices, forms and reports automatically and turns the data into real-time dashboards, saving hours of manual data entry every week.

Service Offer: from \$

- Automatic data extraction from invoices and forms,
- Real-time reports and dashboards,
- Fewer manual errors,

- Export to Excel or your existing system

AI Integration into Existing Systems

Add AI to the tools you already use, like your ERP, CRM or website, without replacing them, so your current system becomes smarter and faster.

Service Offer: from \$

- Works with your ERP,
- CRM or website,
- No need to change your current system,
- Custom AI features for your business,
- Secure setup and team training

Web & Application Development

High-Converting Landing Pages

Ultra-fast, conversion-focused landing pages engineered to capture high-intent leads and maximize marketing ROI.

Service Offer:

- Lightning-fast page performance and optimized core web vitals.
- Strategic UI/UX architecture designed to maximize click-through rates.
- Seamless integration with lead capture forms, CRM systems, and analytics tools.

Custom Web Applications

Tailor-made web solutions architected to streamline complex business workflows and automate operational processes.

Service Offer:

- End-to-end bespoke web application engineering.
- Modular, scalable backend logic for multi-user workflows.
- Modern front-end architectures.

Enterprise ERP, CRM & Bespoke Management Software

Data-driven enterprise management ecosystems built to centralize operational control, analytics, and client management.

Service Offer:

- Custom ERP and CRM architectures built to mirror your business processes.
- Real-time operational dashboards and automated reporting tools.

- High-security multi-role user authentication and access controls.

Secure API Development & System Integrations

Robust API architectures and system interoperability solutions that seamlessly unify disparate digital ecosystems.

Service Offer:

- High-performance RESTful API engineering.
- Secure third-party integrations (payment gateways, logistics, and cloud platforms).
- Legacy system modernization and real-time data synchronization.

E-Commerce Solutions

1. Custom E-Commerce Storefronts

Tailored online stores engineered for effortless shopping experiences and strong brand identity.

Service Offer:

- Unique, brand-aligned UI/UX designs optimized for mobile and desktop shoppers.
- Intuitive product showcase, smart search, and category navigation.
- Frictionless user journeys that encourage repeat purchases and brand loyalty.

High-Performance & Scalable Infrastructure

Fast-loading, bulletproof digital storefronts built to effortlessly handle massive flash sales and traffic spikes.

Service Offer:

- Ultra-fast page load speeds to prevent bounce rates and drop-offs.
- Cloud-resilient architecture that stays 100% online during peak promotional campaigns.
- High-concurrency database optimization for smooth user traffic management.

Payment Gateway & Automated Logistics Integration

Unified checkout and fulfillment systems connecting local payments and automated courier tracking.

Service Offer:

- Instant integration with bKash, Nagad, Cards, and international payment gateways.
- Automated shipping rate calculation.
- Real-time automated order tracking for customers via SMS and web dashboards.

Real-Time Inventory & Order Management Systems

Centralized operations control to track stock levels, manage orders, and automate stock replenishments.

Service Offer:

- Stock synchronization across multiple channels to prevent overselling.
- Automated low-stock alerts and purchase order generation.
- Unified admin dashboard for processing orders, returns, and customer records.

Conversion Rate Optimization & Cart Recovery

Strategic checkout architectures designed to minimize cart abandonment and drive maximum revenue per visitor.

Service Offer:

- Simplified 1-click checkout flows to eliminate purchase friction.
- Automated abandoned cart recovery via WhatsApp, SMS, and Email follow-ups.
- Built-in upsell and cross-sell triggers to increase average order value.

Digital Marketing
